# Formative assessment implementation checklist

Implementation checklists are a list of practical steps you can take to support the implementation of an evidence-based practice in your setting.

## Have I …

☐ Identified a way to determine where my students are currently at in their learning and the correct level of challenge for them? (either through a diagnostic task or existing data)

☐ Written achievable learning objectives for the lesson?

☐ Presented these objectives in a way that is easy for students to understand?

☐ Provided students with models and scaffolds that allow them to see what success in this lesson looks like? (See explicit instruction for more details)

☐ Created opportunities within every lesson to collect formative assessment?

☐ Provided timely feedback to progress my students' understanding and skill development?

☐ Progressed students who have mastered the skill onto the next step of learning? (See mastery learning)
